SP120 SUPER PURITY PRESSURE SWITCH SERIES

Industry leading customers have depended upon the reliability and performance of the SP120 Series since 1989. This series features an all stainless steel sensor in addition to an all welded construction. The SP120 Series incorporates Wasco's proprietary manufacturing method which eliminates all leak paths.

This series is a perfect switch to handle corrosive media with high accuracy and tight tolerance.

SP120 SERIES HIGHLIGHTS

We've designed these switches for high purity applications such as semiconductor equipment. The SP120 Series does not contain any elastomer or an O-ring. All switches are helium leak tested to $\leq 1 \times 10^{-9}$ std cc/sec Helium per SEMI F1.

TYPICAL APPLICATIONS

- Gas Boxes
- Ozone Systems
- Gas Distribution Systems
- Semiconductor Equipment
